#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## DETAILED ACTION

In view of applicant's argument, the examiner has decided to issue another non-final office action to explicitly address the compliant support block.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sheridan et al (4,599,908).

1. Sheridan's device disclose a compliant support block at 32 or 42 for optical communications systems having a longitudinal axis and a load-receiving surface at 44 oriented substantially parallel to said longitudinal axis, said load receiving surface being suitable to receive an applied load (50) in a direction substantially orthogonal to said longitudinal axis; and a fiber at 54, 56 disposed in said compliant support block and extending substantially along and at an angle to said longitudinal axis of said compliant support block, a support frame with the base at 34 with and an opening at 46 allowing the expansion of the compliant block along the longitudinal axis (which also an inherent functional limitation).

***Conclusion***

a. Claims 3-4, 12-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Prior art fails to disclose the rigid bar or micro-spheres disposed in the compliant support block between the Bragg-grating fiber and the receiving load surface with rest of the claim limitations.

Claims 5-10, 14-19 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean F. Duverne whose telephone number is (571) 272-2091. The examiner can normally be reached on 9:00-7:30, Monday-Thursday.
